Dear Sir / Madam

with reference to the Mottram, Hollingworth and Tintwistle by-pass.

How much longer are we expected to put up with the beauracratc delays?

The previous enquiry opened and adjourned in September 2007 almost, one year ago.

Do the people responsible for causing these delays appreciate the misery we have to endure day and night with the lorries, wagons trucks etc? They thunder through our villages day and night and through the night ALL WEEKEND. To endure the noise, the nuisance, the smells etc would be bad enough during normal peak rush hours, but to be woken at 2am on a Saturday and Sunday morning is torturous.

The effect on my mental health as well as my physical health is just not acceptable I suffer with emphysema and the traffic situation, makes this far worse. Somebody somewhere must make a firm decision to resolve this situation.

I cannot open my windows and my house shakes with the volume of traffic that passes.

I cannot understand what is causing the delay and feel a great deal of money is being wasted trying to deal with this. When the woodhead pass and Snake pass are closed the lorries and wagons then take an alternate route, why can this not be made permanent and a weight restriction be put on our roads to prevent these nuisances. I appreciate they have a job to do, but when there is an alternative they will have to use it.

My house is devaluing, my health is deteriorating and I feel my human rights are being extorted.

I have considered legal action but I am not in a financial position to follow this through.

The beauracratc admin hold ups need to be ripped up and the diggers brought in and the by pass built as soon as possible

This situation cannot continue for everybody home owners, school children, the environment and the drivers.

Action is needed Now!

Yours Faithfully

Christina Deng
